PROFILE

Full-stack developer building web applications, practical AI integrations, and small language-model experiments. Currently developing Isoliq Inno 1, a 3M-parameter model trained from scratch. Built Daily Ledger for my first user, my father, to simplify his everyday bookkeeping.

TECHNICAL SKILLS

Full stack: JavaScript, TypeScript, React, Node.js, Express, MongoDB, Python, Django, HTML, CSS

AI & research: PyTorch, nanoGPT, Gemini API, OpenAI API, tokenizer preparation, pretraining, supervised fine-tuning, dataset auditing

Tools: Git, GitHub, Vite, Shopify

SELECTED PROJECTS

Isoliq Inno 1

Ongoing research

Python · PyTorch · nanoGPT · Google Colab

A 3M-parameter GPT-style language model trained from scratch. An open-source exploration of the whole pipeline, from tokenizer to honest evaluation.

Built a custom BPE tokenizer and reproducible training pipeline; audited datasets and evaluated the limitations of unbalanced fine-tuning data.

Daily Ledger

Used by my father

My father kept his daily ledger in a book. The calculations and upkeep took time, so I built him an app. He now uses it and says it helps him a lot.

Read the project story

Signal AI

Completed

Electron · React · TypeScript · Gemini API

An AI-powered desktop application that transforms real-time news and trending topics into high-quality social media content using Generative AI workflows.

github.com/Priyank910/Signal-AI

Full-Stack Blog Platform

Completed

Node.js · Express.js · MongoDB · EJS · Passport.js

A complete content management system (CMS) with secure user authentication, dynamic routing, and efficient database integration.
